DETAILED ACTION

Acknowledgment

1. This Office Action is responsive to the Amendment filed on 4/23/2007.
Accordingly, claims 1, 3-21 and 23-25 are pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 14, 16, 17 and 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Tong et al (US 6,337,658).

Regarding claims 1, 14, 16, 17 and 19-21, Tong, as shown in figures 1, 3, 4 and 6, teaches a method and apparatus for controlling a directional antenna to receive a plurality of signals from plurality of directions wherein the preferred direction of the directional antenna is selected based on the parameters of signal strengths and frequency spectra. See also column 1, lines 11-19; column 2, line 45 to column 3, line 39; column 4, lines 39-65; column 5, line 38 to column 6, line 56.

Allowable Subject Matter

4. Claims 3-13, 15, 18, and 23-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 14, 16, 17 and 19-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Smith et al (US 2007/0123263) is cited because it is pertinent to the method and apparatus for controlling a directional antenna to receive a plurality of signals from multiple directions.
